

Kelvin Brito

Experienced software engineer passionate about building intuitive & modern web applications

EXPERIENCE

Senior Front-End Engineer • Axios

Dec 2023 - Dec 2024

Front-End Engineer • Axios

Jul 2021 - Dec 2023

- Collaborated cross-functionally with designers, product managers, and engineers while mentoring junior developers on AxiosHQ's enterprise communication platform using React, TypeScript, and Tailwind.
- Built AI-powered Card Templates widget replacing standard 'add new card' functionality, creating React components that surface 3 AI-generated recommendations with modal navigation and seamless card insertion.
- Designed standardized frontend event tracking system using React hooks and TypeScript interfaces, establishing consistent data logging patterns for user interactions and AI feature analytics.
- Pioneered frontend implementation of initial LLM features including translation tools and topic suggestions, establishing React architecture patterns for AI-driven content assistance.
- Developed Smart Brevity AI v3 sidebar interface using React and TypeScript, creating accessible components that enabled one-click application of writing improvements to TipTap editor content.
- Architected hierarchical commenting system for deck/card structure, implementing React state management for contextual commenting across nested TipTap editor instances.

Front-End Engineer • Trazi Ventures

Oct 2020 - Jul 2021

- Built frontend features for Trazi's public records SaaS platform, developing interfaces across React/Next.js and Vue/Nuxt applications with custom filtering for efficient business record discovery.
- Engineered high-performance Vue.js dashboard visualizing 10M+ public records, creating scalable data interaction patterns that streamlined business decision-making.

Front-End Engineer • Carroll Bradford

Dec 2019 - Oct 2020

- Led all frontend development in two-person team for construction project management platform, building comprehensive Vue.js interfaces for project tracking, photo collection, and revenue calculation.
- Owned frontend overhaul of project management dashboard using Vue.js and Sass, delivering enhanced tracking capabilities that contributed to \$11M in company revenue growth.

Front-End Engineer • Independent Contractor

Jun 2016 - Dec 2019

- Designed and developed responsive web applications and business websites for diverse clients using React, HTML, CSS, and JavaScript, delivering custom solutions for small businesses and startups across Miami.
- Optimized client applications for performance and accessibility while delivering all projects on time and within budget, maintaining high-quality code standards and building strong client relationships.

SKILLS

Frontend Technologies

HTML, CSS, JavaScript (ES6+), TypeScript, React, Next.js, Vue.js, Sass, TailwindCSS

Backend & Database

Node.js, SQL, Firebase, NeonDB, DrizzleORM

State & Data Management

Jotai, Recoil, React Query, REST APIs, JSON

Specialized Tools

shadcn, Storybook

Testing & Quality

Jest, React Testing Library, Storybook

Tools & Platforms

Git, Github, Vercel, AWS (S3), npm/yarn

Design & UI

Figma, Framer, Responsive Design, UI/UX Principles, Web Accessibility, Performance Optimization

PROJECTS

ArchitectGPT

AI-powered architecture and interior design platform enabling instant visual transformations through photo uploads

Next.js • TypeScript • Firebase

World's Radio

Global radio streaming platform providing access to thousands of international radio stations with interactive world map

Next.js • TypeScript • TailwindCSS • Mapbox • Framer Motion

EDUCATION

University of South Carolina

May 2019

Bachelor of Science, Business Administration

GPA 3.65, Magna Cum Laude
